BACKFLOW PREVENTER VALVE

PVC VALVE TO RESTRAIN BACKWATER

Following the custom of spearheading numerous inventive products, the Astral Pipes has come up with one more value-added product 'Backflow Preventer Valve'. The Backflow preventer valve is typically used to shield private underground seepage frameworks and for flooding protection which is mainly caused by the public sewers system.

AIR ADMITTANCE VALVE

NEGATIVE PRESSURE ELIMINATOR FOR UNRESTRICTED SEWAGE SYSTEM

Astral Air Admittance Valves respond to the negative air pressure created in a sewage system when sanitary facilities are used. Sewage flow can produce negative pressure and then water is drawn out of the siphons. Air admittance valves help to provide air supply to the sewage system and thus compensate for negative air pressure. Astral Air Admittance Valves are manufactured with latest European standards and their working temperature range is from -20°C to +60°C.

STANDARDS & SPECIFICATIONS

EN:12380 and EN: ISO 3126

GULLY TRAP

Bottle Gully Traps are designed to prevent ingress of the foul smell produced in the sewers, drains, waste-pipes. It uses a removable inner sleeve (or central chamber) that creates a space between itself and the wall of the gully that the water is forced up to reach the outlet pipe. Bottle Gully Traps are ideal for rainwater and wastewater drainage network.
