LEADING THE LEAD-FREE PIPE MOVEMENT

Lead (Pb on the Periodic Table) is one of the most naturally occurring elements on the planet. With little or no known biological benefit to humans, Lead causes a lot of damage and leads to poisoning when imbibed.

The lead can easily leach or dissolve into the water from transportation pipes and can be fatal. High blood lead levels in children can cause consequences that may be irreversible including learning disabilities, behavioural problems and mental retardation.

The world over, Lead-free piping is the way forward to transport potable water. Something we've been doing at Astral Pipes for over many years now. Our lead-free pipes have exceeded all quality benchmarks and continue to be one of our bestselling products.

THE OUTSTANDING FEATURE OF ASTRAL SILENCIO IS OUR 3 LAYER CONSTRUCTION AND SPECIAL SOCKET JOINT:

- 1) External Layer - PP The tough protective shell of the pipe. Sturdy and highly impact resistant.
- 2) Middle Layer - Mineral Reinforced PP Mineral-reinforced plastic, provides very high stability and establishes the superior noise insulating effect.
- 3) Internal Layer - PP Provides a superior flow performance with its smooth structure. It is resistant against high water temperatures.

SPECIALTY FITTINGS

BACKFLOW PREVENTER VALVE

PVC VALVE TO RESTRAIN BACKWATER

Following the custom of spearheading numerous inventive products, the Astral Pipes has come up with one more value-added product 'Backflow Preventer Valve'. The Backflow preventer valve is typically used to shield private underground seepage frameworks and for flooding protection which is mainly caused by the public sewers system.

STANDARDS & SPECIFICATIONS

EN 13564

HSN CODE: 39174000

AIR ADMITTANCE VALVE

NEGATIVE PRESSURE ELIMINATOR FOR UNRESTRICTED SEWAGE SYSTEM

Astral Air Admittance Valves respond to the negative air pressure created in a sewage system when sanitary facilities are used. Sewage flow can produce negative pressure and then water is drawn out of the siphons. Air admittance valves help to provide air supply to the sewage system and thus compensate for negative air pressure. Astral Air Admittance Valves are manufactured with latest European standards and their working temperature range is from -20°C to +60°C.

GULLY TRAP

Bottle Gully Traps are designed to prevent ingress of the foul smell produced in the sewers, drains, waste-pipes. It uses a removable inner sleeve (or central chamber) that creates a space between itself and the wall of the gully that the water is forced up to reach the outlet pipe. Bottle Gully Traps are ideal for rainwater and wastewater drainage network.
